

Kitty Dooley, COL and Education, Holyrood Campus

Sustainability Information Notice boards across Holyrood Campus

Why I became a Sustainability Champion

I became an Energy Coordinator to begin with which then led on to becoming a Sustainability Champion for my department. I have learnt a huge amount from the Department for Social Responsibility and Sustainability, from how we can be more sustainable at work, and at home. It has pushed me to find out more about sustainability in my own community, which in turn can be communicated with others. I particularly enjoy the Conscious Cinema films evenings, and working towards the Sustainability Awards. I have taken a number of Sustainability courses through Future Learn about Fashion and Climate change: Solutions to continue this learning.

My sustainable project or actions

- The sustainability noticeboards make us all socially aware of what we need to do and how we can do it, for example where we can recycle beauty products, to a local beach clean we can help with. They also list all recycling facilities in building.
- The boards were only just put up before the Lockdown so measuring the impact will be done on return.
- The boards are updated weekly with new events and information, The plan is to get a representative from each of the seven buildings to maintain their buildings noticeboard. Every building in the University could have a sustainability notice board.
